PROFILE INFO

I am a **Bachelor's in Computer Science (Database Management)** student at **Universiti Teknikal Malaysia Melaka (UTeM)**, currently seeking a 24-week internship in the field of Computer Science or Information Technology. I am eager to apply my academic knowledge and technical skills in a real-world environment and contribute meaningfully to a professional team.

With hands-on experience in system development, web technologies, and project collaboration, I am confident that an internship at a well-established company will help me grow professionally. I am highly motivated to take on new challenges, develop innovative solutions, and enhance my technical expertise in a practical setting.

PROJECTS

CLINIC MANAGEMENT SYSTEM

OKT 2022 - MAC 2023

- A web-based application designed to streamline clinic operations including patient registration, appointment scheduling, doctor management, and prescription records. Implemented using PHP, MySQL, and Bootstrap, the system enhances patient service efficiency and administrative control.

GIFT DELIVERY SYSTEM

OKT 2023 - JAN 2024

- A mobile-friendly internal delivery system for students to send and receive gifts across campus buildings. Features include user authentication, order tracking, and delivery staff assignment. Developed using Firebase, JavaScript, and Google Maps API for real-time location tracking.

ONLINE BOOKSPHERE SYSTEM

OKT 2024 - JAN 2025

- An e-commerce platform for buying and selling books among students. The system includes search filters, user reviews, and secure payment integration. Built with PHP, MySQL, and AJAX, it simplifies second-hand book exchange in educational institutions.

TOUR PACKAGE BOOKING SYSTEM

MAC 2025 - PRESENT

- A responsive booking system allowing users to browse, book, and manage tour packages. Features like booking status updates, deposit tracking, and admin approval.
